Jim,

Sorry couldn't get hold of you before you left, but I finished my review of the R9/HQ chains on the Sharepoint site.

The files I did not modify (i.e., redact) were files where I did not believe redaction was necessary.

I did not redact any HQ-HQ communications.

I did not apply the redactions. In some cases, this would have applied HQ redactions along with mine, and did not want to do that without HQ approval. Let me know if you want me to apply the redactions.

I've got a batch of R9 docs that I need to go through on a separate Sharepoint site. I may need HQ to go through some of them, but probably not. I think many of the HQ communications we have are redundant with the ones on Laura's Sharepoint site.

Thanks,

Rich

How is your review going? Have you had chance to review the Region 9/HQ chained emails Laura put up on a SharePoint site yet?

I'm going out of town July 23-28. Can we talk review of the remaining materials when I return?
